

Name: Stephanie Lee Wee Kheng
Programme: BSc (Hons) Computer Science, Coventry University
Year Graduate: Graduated in 2
Current Job/Studies: Analyst Programmer

Speech

Whoever said what you learn in college is of no relevance to your working life? For me, my degree took me to where I am today.

I pursued a diploma in Computing & IT with INTI, and continued towards a Bachelor's Degree in Comp. Science soon after. Studies were often accompanied with stress, projects & assignments with sleepless nights, and final exams nightmares. The support from experienced lecturers, the humour and ideas from brilliant course mates & friends made brought about motivation to excel, the determination to scale greater heights and explore further horizons. The warmth of close friends added to the happier times which were well cherished.

The basics, foundation and skills I needed in the industry today are attributed to what I picked up and embraced in college, and how I applied them to my everyday work. My career is still in its infancy yet I am reassured that it's a promising road ahead.

In my final year at INTI before my last exam hurdle was up, I took a brief look back at when I first started in 1st term & where I had finally arrived at, and I knew it had been time well spent. Today 3 years down the road, it warms the heart to know that I still feel the same way.

Life is not a race, but a journey to be savored each step of the way.
