

Name: Tee Yee Leng
Programme: BSc (Hons) Network Computing, Coventry University
Current Job/Studies: Software Engineer
Company Name: JST Technology Sdn. Bhd.

Speech

I am pleased to study at INTI. Throughout the course, I have been taught both the theoretical and practical aspects of computer networking. I have also been exposed to different cultures by interacting classmates and lecturers are from overseas. The clubs and student activities at INTI College have also built up my communications, team buildings and leadership skills.

The learning experience at INTI has been a difficult but at the same time a fulfilling road. There were lots of assignments and projects which were very challenging. I still remember how I have sleepless nights working on my final year projects! However, I am glad to be given these works as it has helped me to gain more practical experiences as well as learning how to manage my time. Throughout my course, I am also exposed to various network technologies which are very up to date. I was glad that I was exposed to these technologies as it turned out that a lot of them are related to my current job!

My current job involves software development in the area of networking. I am enjoying every moment of it! I would like to say a big "THANK YOU" to INTI College Malaysia!
