

Name: Su Yu Min
Programme: BCP (British Computing Programme)
Year Graduate: July 2004
Current Job/Studies: Senior Programmer and IT Administrator

Scope of Work:

- To develop Event Management applications.
- To maintain computer laptops and hardware such as barcode printers.
- To administer and maintain the server, database and the network.
- To monitor and communicate with out-sourced web-developers.

Challenges:

As my company is an event management organization, I meet different people from various countries whenever there are exhibitions going on. Therefore, this is a good opportunity for me to communicate and work with people from various countries and cultural backgrounds, and share experiences and knowledge with them.

Moreover, I was assigned many interesting and challenging programming assignments from the manager. I also play the role as a project manager, which allows me to learn and manage projects by communicating and assisting various out-source partners for web applications.

Rewards:

- Opportunities to learn how to lead different project teams and experience in communicating with individuals from different places. On top of that, the manager allows me to work freely and learn to manage my own time.

Future Goals:

- Keep myself updated with the latest programming technologies and to go abroad to work in large software houses to gain more experience and knowledge.
- I am also interested to get involved in system testing, database management, network management and etc.
